FIGHT AGAINST DOPING**WADA tests!**

Moutier, June 17, 2004: The World Antidoping Agency (WADA) carried out numerous out-of-competition tests within the international gymnastics community in 2003.

They covered all FIG disciplines and were done on all continents. Within the 121 controls carried out, only one came up positive to diuretic.

The FIG adheres to the Agency's programme and encourages its gymnasts in prevention by emphasising information and education, both to athletes and to coaches through the FIG Academies, where the sport's trainers are ... trained.
