

## Pegases

Ref. 1407100

'Pegases' is the prime example of what Janssen-Fritsen is all about and has been designed to make vaulting safer. A very stable base, easy to adjust in height and with all the wishes and desires of gymnasts and coaches incorporated in one piece of equipment. 'Pegases' is suitable for men's and women's competitions as well as for training at all levels, 'Pegases' is designed for gymnastics. It is ergonomically designed. The hand placement and sight lines for the gymnast are ideal and the cushioning material directly under the hands minimises impact force on hands, wrists and shoulders. The mechanical part of 'Pegases' is engineered unlike most other gymnastic equipment. It is engineered the Janssen-Fritsen way; solid and precise. 'Pegases' was introduced at the World Championships in Ghent 2001. For the Olympic Games in Athens in 2004 there was no hesitation or question which vault should be used for the biggest competition in gymnastics; the Janssen-Fritsen 'Pegases'. 'Pegases' was the competition vault in Beijing in 2008 again.

height adjustment and safety locking

tension system

transport trolley

### Technical data:

Length:	120 cm
Width:	95 cm
Height:	adjustable from 105-135 cm
Weight:	145 kg
Reference number:	1407100

- Height adjustment and safety locking combined in one handle
- Adjustment in less than 10 seconds
- 3° lengthwise angle for a better aim
- Heavy-duty galvanised and epoxy-coated steel construction
- 4 adjustable feet to compensate for irregularities of the floor
- Protective padding around apparatus to avoid injuries
- Tension system for safe use (FIG requirement)
- Equal rebound over the entire surface
- Clear height indication on the side
- Transport trolley included
- Optional; soft training cover
- Instruction manual / CD included

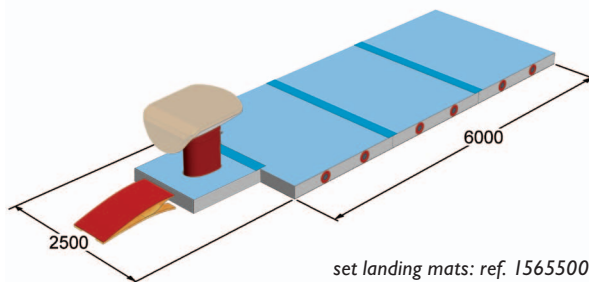

FIG certified competition model

# Pegases

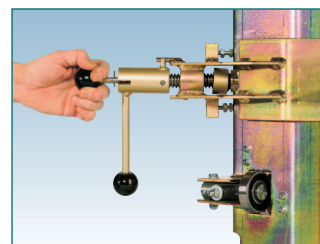

Ref. 1407100

## Safety first

Pegases is not only a high-class competition vault, but it is also ideal for training. The easy-to-operate height adjustment mechanism allows for even young gymnasts to change the height safely and quickly. The soft padding on all sides and the equal rebound over the total surface make Pegases a very safe and versatile training device.

set landing mats: ref. 1565500

### Packing dimensions:

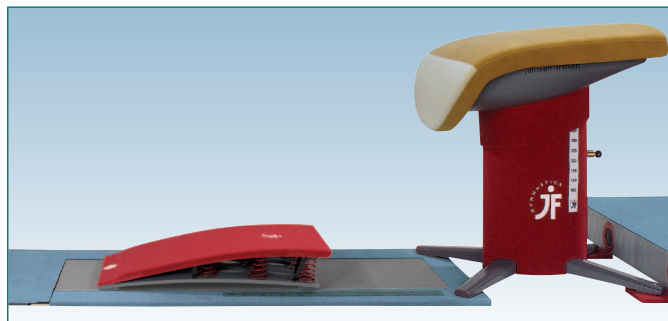

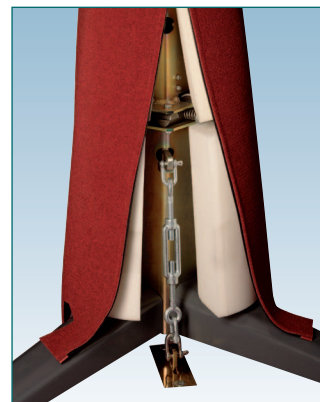

- 1 Pallet of 130x108x128 cm
- Weight: 160 kg
- Packed in a specially designed carton box

### FIG Apparatus Norms:

- Deflection: 34-44 mm
- Rebound: 120-180 mm
- Max. force on the hands:  $\leq 2500$  N

### Related equipment:

- Soft training cover: ref. 1407120
- Rondat mat: ref. 1595320
- Handy mat: ref. 1540110
- Floor anchor: ref. 1384121
- Soft mat: ref. 1540130
