

Parallel bars 'Pallas'®

Ref. 1403100

These new Top Class Janssen-Fritsen parallel bars 'Pallas'® comply with the latest FIG apparatus norms. The redesigned supports offer a superior degree of stability and rigidity and are provided with an improved 3-point locking mechanism. This system prevents accidental loosening of the uprights, thus offering the gymnast maximum security. The width adjustment is stepless for an individual setting. The high-frequency glued plywood rails are reinforced with a fibreglass insert to provide the bars with the best strength and flexibility. Nonmarking floor protectors are included.

3-point locking mechanism

rail with 3 fibreglass inserts
ref. 2202550

Technical data:

Height: adjustable from 160-210 cm with 5 cm increments
 Width: stepless adjustment from 41-61 cm
 Rails: high-frequency glued laminated wood with fibreglass insert
 Reference number: 1403100

- New 3-point locking mechanism
- Rigid steel columns with heavy cast supports, epoxy-coated
- Heavy-duty epoxy-coated steel base with floor protectors
- Nickel-plated sliding tubes
- Nickel-plated cast-iron precision clamp heads and rail supports
- Dimensions: 350x166 cm (including rails)

FIG certified competition model

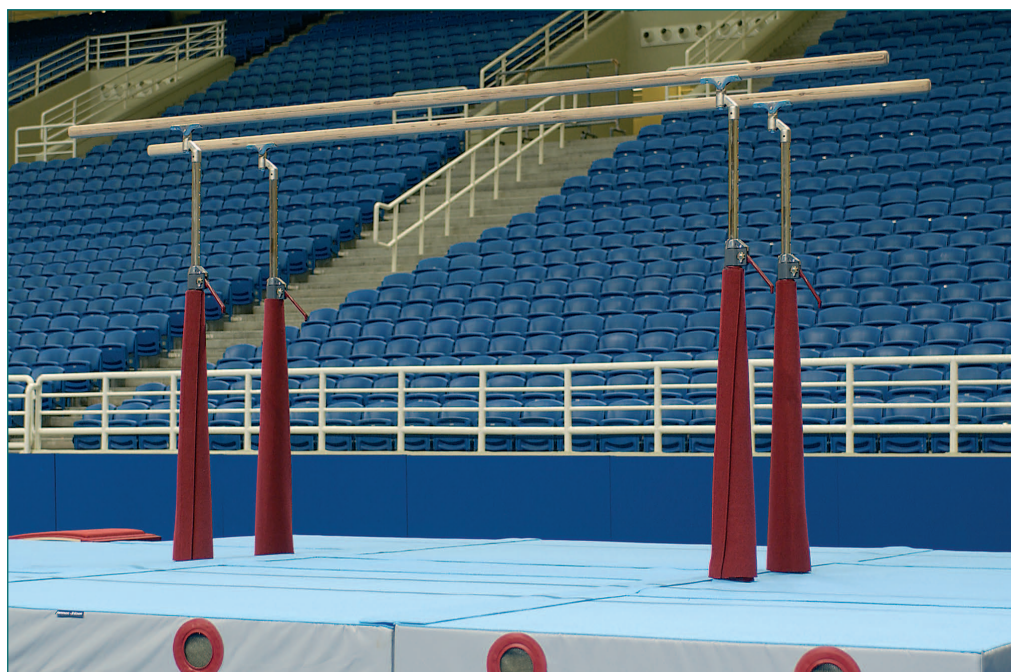

Latest update: December 2009

Parallel bars 'Pallas'®

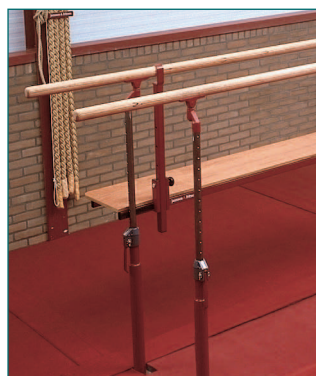

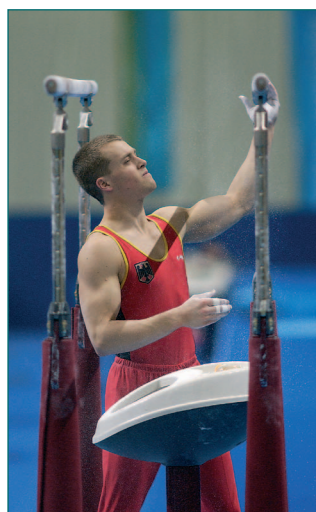

Ref. I403100

Superb characteristics

The present level of exercises requires very stable and rigid parallel bars. Especially for lateral entries, stability is essential. Vibrations disturb a gymnast and have to be reduced to a minimum in milliseconds. The FIG has laid down severe norms regarding these aspects. During the tests at the FIG Testing Institute, the Janssen-Fritsen parallel bars 'Pallas'® passed the exam with flying colours. The 'Pallas'® is highly appreciated by gymnasts all around the world for competitions as well as for training.

safety padding, ref. I566020

trainer console, ref. I490381

Packing dimensions:

- 1 Pallet of 255x172x38 cm
- 1 Package of 350x12x6 cm
- Volume: 1,7 m³
- Weight: 343 kg

FIG Apparatus Norms:

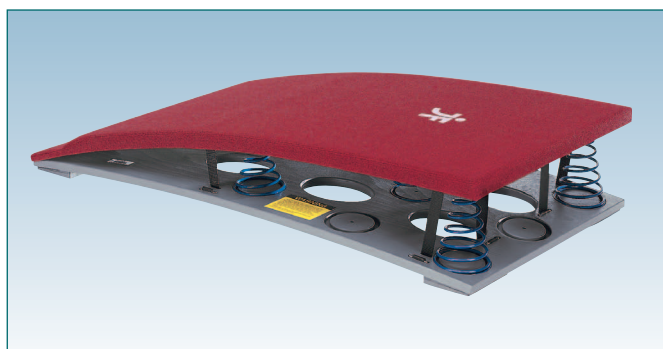

- Competition height: 200 cm
- Distance between rails: 42-52 cm
